Acta Scientiarum Mathematicarum
Volume 57, Numbers 1-4, 1993

Author index

T. Ando, Parameterization of minimal points of some convex sets of matrices 3–10

W. Arveson, Improper filtrations for C^*-algebras: spectra of unilateral tridiagonal operators 11–24

F. V. Atkinson, H. Langer, R. Mennicken, Sturm–Liouville problems with coefficients which depend analytically on the eigenvalue parameter 25–44

A. Atzmon, Unicellular and non-unicellular dissipative operators 45–54

S. Baron, F. Schipp, On complementary spaces and multipliers for Walsh series 289–303

H. Bercovici, Commuting power-bounded operators 55–64

P. L. Butzer, G. Schöttler, Sampling expansions for Jacobi Functions and their applications 305–327

Á. Császár, D-completions of Pervin-type quasi-uniformities 329–335

S. Csörgő, A rate of convergence for coupon collectors 337–351

R. E. Curto, F.-H. Vasilescu, Automorphism invariance of the operator-valued Poisson transform 65–78

J. Demetrovics, V. D. Thi, Some computational problems related to the functional dependency in the relational datamodel 627–638

R. G. Douglas, C. Foias, Uniqueness of multi-variate canonical models 79–81

J. Eschmeier, M. Putinar, Spectra of analytic Toeplitz tuples on Bergman spaces 83–100

C. Foias, R. G. Douglas, Uniqueness of multi-variate canonical models 79–81

C. Foias, C. Gu, A. Tannenbaum, Intertwining dilations, intertwining extensions and causality 101–123

C. K. Fong, P. Y. Wu, Diagonal operators: dilation, sum and product 125–138

T. Furuta, Some norm inequalities and operator inequalities via the Furuta inequality 139–145

F. Gécseg, B. Imreh, On finite isomorphically complete systems of tree automata 497–502

C. Gu, A. Tannenbaum, C. Foias, Intertwining dilations, intertwining extensions and causality 101–123

B. Gyires, On permanent identities 503–514

K. Győry, On the number of pairs of polynomials with given resultant or given semi-resultant 515–529

G. Halász, On projections into the space of trigonometric polynomials 353–366

L. Hatvani, On the stability of the zero solution of nonlinear second order differential equations 367–371

M. L. Husty, P. T. Nagy, Parallelismus auf Liegruppen 531–542

B. Imreh, F. Gécseg, On finite isomorphically complete systems of tree automata 497–502

K.-H. Indlekofer, I. Kátai, P. Racsko, Some remarks on generalized number systems 543–553

J. M. Isidro, L. L. Stachó, On weakly and weakly* continuous elements in Jordan triples 555–567

I. Joó, On the pointwise controllability of circular membranes 373–399

J.-P. Kahane, A Riccati equation and ground states of some unidimensional Schrödinger operators 147–174

I. Kátai, P. Racsko, K.-H. Indlekofer, Some remarks on generalized number systems 543–553

L. Kérchy, On the reducing essential spectra of contractions 175–198

S. Komlósi, On pseudoconvex functions 569–586

A. Korányi, Spectral properties of the Cartan matrices 587–592

H. Langer, R. Mennicken, F. V. Atkinson, Sturm–Liouville problems with coefficients which depend analytically on the eigenvalue parameter 25–44

L. Leindler, Generalizations of some theorems of Mulholland concerning Dirichlet series 401–418

D. S. Lubinsky, V. Totik, How to discretize a logarithmic potential? 419–428

G. Mastroianni, P. Vértesi, Mean convergence of Lagrange interpolation on arbitrary system of nodes 429–441
